SOUTH SANDWICH

VP8ASR, who is G4GHP and currently on the Falklands, says he and possibly others are planning a trip to "Thule" Island, part of the S. Sandwich group, November 15 to 17. They hope to operate. Callsign could be G4GHP/VP8, or a specific VP8 call, and operation is likely to be SSB only, maybe only on 20 Meters. This is all the information we have at presstime.

PY0FN showed on 20 SSB Oct 13, claiming to be on Fernando de Noronha, and no other information is available.

SAN FELIX CEDAA continues, despite a generator failure on Oct 11; they were on 75 Meters, working from a list, and they finished the list on battery power. They have been putting out word that Oct 21-25 will be devoted exclusively to 10 Meter CW work.

SOMALIA will be activated again for six weeks, starting Oct 25, according to European sources, who say OH2JL is being assigned there. DXPress says he operated last year about this time as T25JL, but we recall no reports here.

TWO WINDOWS for entering Albania have come and gone for DJ0UJ, the last being the first week of October. OH2BH said to still be waiting for an invitation.

BOTH CAMBODIA (XU1SS) and CHINA (BY1PK and BY4AA) have had good signals in No.

America the past ten days or so; BY4AA was S9 last weekend, with VE7BC using a linear he had taken along. Trouble is, he spent the entire opening to the East Coast rag-chewing, and took callers only as the band was fading. With winter approaching the Chinese stations are coming through to the Right Coast in the evenings.

NO WORD from Craig Maxey, WB7RFA, that he has obtained Sao Tome permission; as we reported in TDXB 250, he will be there the end of October, and still hopes to get operating permission on the spot.

VE3FRA's DX Report says that one G3LCS will be on the air from the U.A.E., signing A61AA soon. It's reported that his employer is a member of the Royal family.

ARRL's DX Advisory Committee getting read to vote on country status for England's claimed part of Cyprus; keep those ZC4 and 5B4 QSLs handy! Still no indication that there will be another vote on the Pribilofs status.

VE3FXT began his 100-country announced expedition from St Paul Island, signing CY0SPI, although there was some doubt of it's counting, as the Canadian Coast Guard claimed to know nothing about him. George was heard saying his next stop would be St. Helena (ZD7).

MORE S21 activity reported last week, another JA operating from Bangladesh, although our reporter couldn't get the whole callsign, as the station was weak and working Europe on 20 Meters. This is likely to be another unauthorized operation.

QRZ DX published a letter from VE7FXX (5X5GK), indicating he is aware of the DXCC documentation problems, and is working on them; 5U7LD's friends back in Italy also have some additional paperwork ready to send to Newington.

DON'T FORGET that VK0GC was supposed to be back on Macquarie around Oct 1, and on the air shortly; in the past he has especially liked 40 and 80 Meters.

The DX Bulletin (ISSN 0279-8077) is published fifty times per year. Subscription rates available upon request. The DX Bulletin is published at Burnap Brook Road, Andover, CT 06232: Second-class postage paid at Andover, CT. POSTMASTER: Send address changes to The DX Bulletin, Andover, CT 06232.

AMATEUR RADIO IN PAPUA NEW GUINEA

by JIM SMITH, P29JS/VK9NS

MY FIRST ARRIVAL in Papua New Guinea was in early 1975, after a lengthy trip from the U.K. It so happened that this year was particularly important, since on 17 September P.N.G. became an independent country. Until then, in terms of DXCC, two separate countries existed: Papua and New Guinea. No real distinction was ever made in callsign allocation, both areas being VK9. In addition, to confuse the issue further, this same VK9 prefix was used in several territories of Australia. It was always good fun working a VK9 and then keeping fingers crossed hoping it was one you needed!

Before independence, the P and T Department had been gradually taking over more and more of the Radio Licensing Structure...from Australia. As an indication of this, the prefix P2 was introduced and in order for identities to be preserved, VK9BS became P29BS, for example. These changes were on January 1, 1975.

To say that Papua New Guinea is a diverse country is a gross understatement; the hundreds of islands support many different cultures and some 700 languages, in addition to Pidgin, which is sort of a common language. Mountain peaks and ranges over 15,000 feet high effectively cut off neighboring groups from one another.

Radio licensing is by the Post and Telecommunications Corporation, and while there is no formal reciprocal licensing with most countries, many licenses are recognized. Frequency allocations are excellent and in many cases very different from Australia. Probably the most significant event was the introduction of a Novice license a few years ago, the first being issued to Ron Pain, P29NRP, in 1977.

"Z" callsigns are also issued, with the full theory exam but no Morse code test. These licensees are limited to VHF and UHF, and the satellites. Rick Warnett, P29ZFS, is one of the most well known of these "Z" licensees.

Propagation from here can be quite unique, with most of the Asian countries easily worked. The P29 callsign does help! Long path openings 'round the Equator have to be heard to be believed (those who have operated from spots like Curacao know what Jim's talking about - ed).

As P29JS some years ago I made over 70,000 QSOs. Now I am back with Civil Aviation for a short time and happy to have retained my P29JS callsign. Best spot to find me is on the 14.220 net, after 0500Z.

LETTER FROM AFRICA

RECIPROCAL AGREEMENT WITH SOUTH AFRICA coming soon, says our correspondent in the area. Negotiations have been going on for about two years and FCC and the US State Department have finally come to terms with the S.A. licensing authorities. This means that U.S. amateurs will be able to get a ZS callsign, then use that to obtain callsigns (and operating permission) in Lesotho or Swaziland, through agreements those countries have with the Republic of S. Africa. Currently, one must be a resident of Swaziland to get a license; in Lesotho, licensing is possible if one has an address to claim, but the new agreement with S. Africa will make things easier.

TDXB has reported on AB4Y, currently stationed in Maputo Mozambique (Issue 246) and word is that although the government there appears to be receptive to amateur radio, there is a "log jam" in the Ministry of Security and Interior, because "rebels" are operating in the country. They say amateur radio will be allowed again when the security problems are solved. AB4Y's licensing requests, including one for a special station at a trade show in July, have so far been turned down.

The question of amateur radio and "security" comes up often in "Third World" countries; many of the people in power got there using clandestine methods which included secret radio communications and they are thus suspicious of others wanting to use so-called personal radios. Around the world, amateur radio equipment is easily obtained and put into operation. These leaders' fears that attempted coups will have radio operators hiding behind the veil of amateur radio may be unfounded, but are fears, nonetheless.

Something else to keep in mind (says our correspondent): say you are talking to a ham in a Third World country, and somehow the subject of conditions there comes up. Maybe you ask an innocuous question about what he had for supper...and there is a food shortage. The current advice is to keep the conversation limited to ham radio, etc. Recall that we mentioned here not long ago that authorities in Thailand like to monitor all amateur radio transmissions, and the problem becomes clear.

NEW ENGLAND DXCC DINNER scheduled for
Nov 10 at the same place as last year,
the Concord Lodge of Elks; featured
speakers will be Tom Frenaye, K1KI, who
publishes a specialty newsletter about
amateur radio in the USSR, and Don
Search, W3AZD, with the latest from the
Newington DXCC Desk. Everyone will
again have an opportunity to be
embarrassed by the DX Quiz, and there
might even be a "DXCC Countdown," ala
the W9DXCC event. Bring your Oldest and
prettiest QSL cards for a contest.
Videotape presentations of the Cambodia
and Laccadives operations are of
interest to hams and non-hams alike.
Write K1ST for additional information.
